

SHOTCRETE AFRICA

SPRAYED CONCRETE PROFESSIONALS

Shotcrete Africa SCP is a Level 2 BBBEE Civils Company utilising the Wet-Shotcrete Method to place Structural Concrete for new structures and concrete repairs.

Sustainable Advantages of Structural Shotcrete

- Program acceleration and cost savings
- Formwork material savings of 50% to 100%;
- Eliminate or reduce need for cranes; concrete buckets and vibrators
- High compressive strength, durability, fire retardation, low permeability with an excellent bond to a variety of substrates
- Highly adaptable and cost-effective repair of hard to access, overhead, vertical, and curved concrete surfaces;
- 30-50% faster when used in new construction
- Waterproof shotcrete

Typical uses:

- Water retaining structures
- Retaining walls
- Highway medians
- Concrete repair
- Architectural
- Mining
- Domes
- Lift shafts
- Canals
- Embankment stabilisation
